Bevat: ZIB-1905.

Publicatieversie 3.4.1 (15-04-2024)

Bevat: ZIB-2049.

1.2 Concept

Traditionally, a family is defined as a group of people of one or more adults who carry responsibility for caring for and raising one or more children.

Currently, the term is used more broadly for all forms of cohabitation which form a recognizable social unit, of people who are or who are not related and who have long-lasting, affective bonds and provide each other with support and care.

1.3 Mindmap

1.4 Purpose

Information on the patient’s family situation is important in determining the extent to which the patient receives and can receive care and support. For example, the age of the patient’s children partially determines whether they can play a role in caregiving.

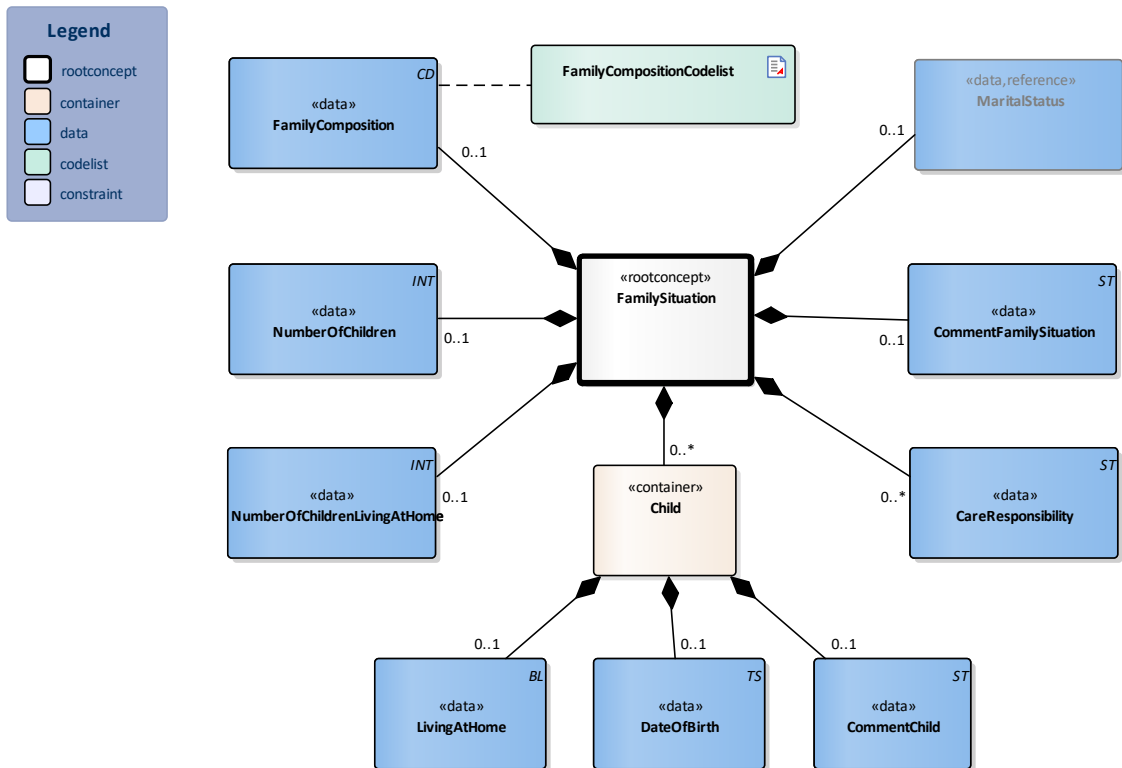

It is also important to know whether the patient needs support for daycare and/or care for dependent family members.

Situations in which this information is important include for example being discharged from the hospital or nursing home.

1.5 Patient Population

1.6 Evidence Base

1.7 Information Model

| «rootconcept» | FamilySituation | |
|----------------------------|--|--|
| Definitie | Root concept of the FamilySituation information model. This concept contains all data elements of the FamilySituation information model. | |
| Datatype | | |
| DCM::ConceptId | NL-CM:7.13.1 | |
| DCM::DefinitionCode | SNOMED CT:365470003 | |
| | Finding of family details and household composition | |
| Opties | | |

| «data» | MaritalStatus | |
|--------------------------|---------------------------|--|
| Definitie | Patient's marital status. | |
| Datatype | | |
| DCM::ConceptId | NL-CM:7.13.7 | |
| DCM::ReferencedConceptId | NL-CM:7.9.1 | This is a reference to the rootconcept of information model MaritalStatus. |
| Opties | | |

| «data» | FamilyComposition | |
|---------------------|--|---|
| Definitie | The family composition describes the patient's home situation and the form of cohabitation. A family can consist of one or more people. | |
| Datatype | CD | |
| DCM::ConceptId | NL-CM:7.13.8 | |
| DCM::DefinitionCode | SNOMED CT:224130005 Household composition | |

| Inwonend | Ja |
| Kind | |
| Geboortedatum | 04-11-2002 |
| Inwonend | Nee |
| BurgerlijkeStaat | |
| BurgerlijkeStaat | Ongehuwd |
| Toelichting | Beide inwonende kinderen zijn zeer zelfstandig. |

1.9 Instructions

Care for family members who depend on the patient is described in the Care Responsibility concept. Family members who can provide the patient with care as a caregiver are entered as a caregiver in the HelpFromOthers information model.

Because of KOPP policy (Kinderen van Ouders met Psychiatrische Problemen, or Children of Parents with Psychiatric Problems) mental healthcare facilities require a record stating whether there are children in the family. This means that in a mental healthcare situation, the number of children (living at home) must be recorded, with information per individual child or as a total number.

1.10 Interpretation

1.11 Care Process

1.12 Example of the Instrument

1.13 Constraints

1.14 Issues

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Model and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.

Nictiz is the independent national competence centre for electronic exchange of health and care information. The activities of Nictiz include the targeted development and management of information standards at the request of and in partnership with the stakeholders in healthcare. Nictiz advises these parties on all aspects of information exchange and identifies (future) national and international developments.
