## 1.1 Revision History

Publicatieversie 1.0 (24-04-2025)

Bevat: ZIB-2179, ZIB-2654.

## 1.2 Concept

A nursing diagnosis gives a label (a term) to a specific physical, mental, social or functional health condition of a client. A nursing diagnosis gives rise to formulate a care plan or, in other words, nursing action is required. The nursing diagnosis is therefore described from the nursing perspective. This means that nurses and caregivers have an influence on improving or reducing the client problem. Synonyms for nursing diagnosis are client problem and nursing problem.

## 1.3 Mindmap

## 1.4 Purpose

The nursing diagnosis forms the basis for nursing actions and interventions and is the reason for formulating a care plan.

## 1.5 Patient Population

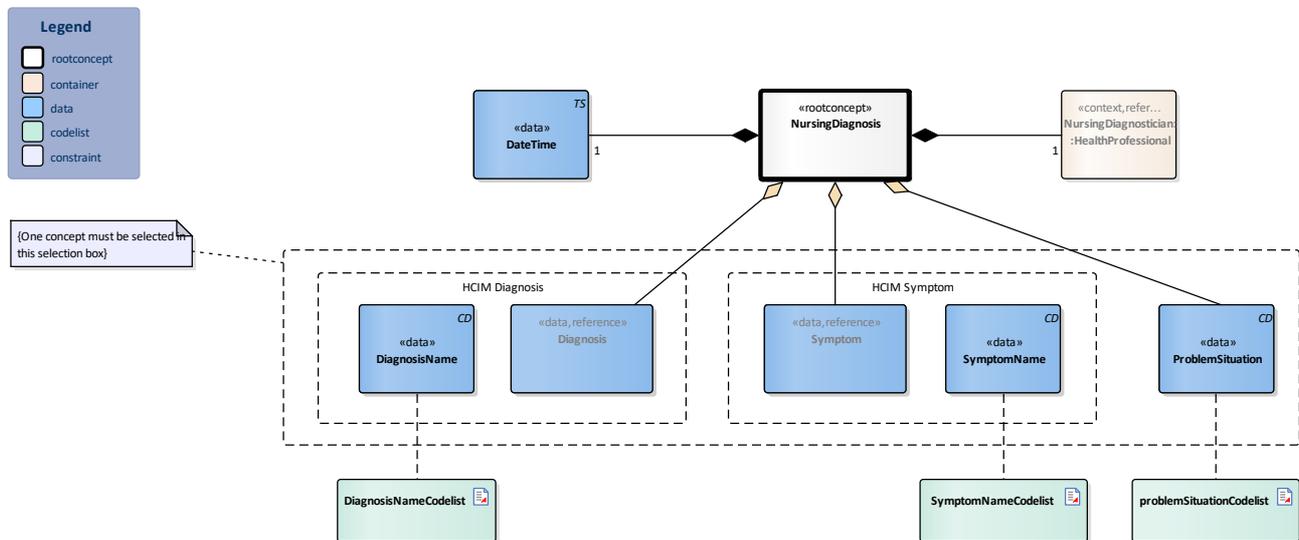

## 1.6 Evidence Base

Nursing diagnoses identify a broad spectrum of patient problems. Some of these have the character of a diagnosis - interpretation of diagnostic data -, and some describe observations that can be seen as symptoms of a condition. In addition, some nursing diagnoses describe social problem situations that negatively affect the patient's condition. Because nursing diagnoses describe concepts that are partly

already modeled in other HCIM's, references to the relevant HCIM's, namely Diagnosis and Symptom, were chosen for the modelling of the nursing diagnosis. In addition, a separate section was created for the social problems.

The advantage of this modelling is that the health professional who determined a nursing diagnosis that has the character of a diagnosis, gains access to all aspects that are specific to a diagnosis, by referring to the HCIM Diagnosis. For nursing diagnoses that indicate a symptom, the same advantage applies, but then by referring to the HCIM Symptom.

## 1.7 Information Model

«rootconcept»	NursingDiagnosis
Definitie	Root concept of the NursingDiagnosis information model. This root concept contains all data elements of the NursingDiagnosis information model.
Datatype	
DCM::ConceptId	NL-CM:5.8.1
Opties	

«data»	Diagnosis	
Definitie	The diagnosis that is labeled as nursing diagnosis.	
Datatype		
DCM::ConceptId	NL-CM:5.8.4	
DCM::ReferencedConceptId	NL-CM:5.6.1	This is a reference to the rootconcept of information model Diagnosis.
Opties		

«data»	DiagnosisName	
Definitie	Name and associated code of the diagnosis. For the nursing diagnoses, a choice can be made from the list of nursing problems of the diagnosis type.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.8.5	
DCM::ValueSet	DiagnosisNameCodeList	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.8.1
Opties		

«data»	Symptom
Definitie	The symptom that is labeled as a nursing diagnosis.
Datatype	

<b>DCM::ConceptId</b>	NL-CM:5.8.6	
<b>DCM::ReferencedConceptId</b>	NL-CM:5.5.1	This is a reference to the rootconcept of information model Symptom.
<b>Opties</b>		

<b>«data»</b>	<b>SymptomName</b>	
<b>Definitie</b>	Name and associated code of the symptom. Nursing diagnoses can be selected from the list of nursing problems of the symptom type.	
<b>Datatype</b>	CD	
<b>DCM::ConceptId</b>	NL-CM:5.8.7	
<b>DCM::ValueSet</b>	SymptomNameCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.8.2
<b>Opties</b>		

<b>«data»</b>	<b>ProblemSituation</b>	
<b>Definitie</b>	The social problem situation that is labeled as a nursing diagnosis. Chosen from the list of nursing problems of the problem situation type.	
<b>Datatype</b>	CD	
<b>DCM::ConceptId</b>	NL-CM:5.8.2	
<b>DCM::ValueSet</b>	problemSituationCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.8.3
<b>Opties</b>		

<b>«context»</b>	<b>NursingDiagnostician::HealthProfessional</b>	
<b>Definitie</b>	Nurse who has determined the nursing diagnosis.	
<b>Datatype</b>		
<b>DCM::ConceptId</b>	NL-CM:5.8.3	
<b>DCM::ReferencedConceptId</b>	NL-CM:17.1.1	This is a reference to the rootconcept of information model HealthProfessional.
<b>Opties</b>		

<b>«data»</b>	<b>DateTime</b>	
<b>Definitie</b>	Date and time, if applicable, at which the health professional has determined the nursing diagnosis.	
<b>Datatype</b>	TS	
<b>DCM::ConceptId</b>	NL-CM:5.8.8	
<b>Opties</b>		

<b>«document»</b>	<b>DiagnosisNameCodelist</b>		
<b>Definitie</b>	In the future, the content of the value list will be narrowed down to a more diagnostic-oriented list.

## 1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the

collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

### **1.19 Terms of Use**

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

### **1.20 Copyrights**

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.

Nictiz is the independent national competence centre for electronic exchange of health and care information. The activities of Nictiz include the targeted development and management of information standards at the request of and in partnership with the stakeholders in healthcare. Nictiz advises these parties on all aspects of information exchange and identifies (future) national and international developments.
